

Call Diverter, Model CD2

Protect your Calling Identity with Unmatched Security and Expanded Features

SYSTEM DESCRIPTION

The CD-2C Mobile Telephone Call Diverter is the perfect device for shielding your telephone number when contacting agents, informants, or other targets. While simple in design and operation, the CD-2C is the most feature rich product of its kind, offering advanced features and unmatched security options. Using cellular telephone technology for call diversion, the CD-2C Mobile Call Diverter is also completely portable, giving user's peace of mind anywhere they roam.

FEATURES and OPERATIONS

Portable Design and Operation

- Powers from +12VDC for operation in automobiles, building without AC power, boats and other vehicles. Also powers from 120/240 VAC 50/60 Hz.
- All necessary connections available on the outside of the case, allowing for case-closed operation.
- Simple operation: once configured, simply connect the two antennas (supplied) and a power cable to the outside of the case—ready to roll.

Security

- Password Protected
- Emergency “kill” pin number
- Tamper proof erase mechanism
- Audible indication of inbound diverted calls (requires pin number)
- Seamless call bridging – no audible clicks or connection noises

Cellular Operation

- Various CD-2C models to accommodate TDMA/CDMA/GSM networks for international use
- Allows for portable operation – car, indoors, outdoors, and remote locations
- GSM versions use SIM cards enabling users to easily modify their accounts and phone numbers
- Covert antennas optional

Caller-ID and Wiretap Avoidance

- Shields undercover numbers and locations
- Dial any number from anywhere. The Caller ID will always show up as that of the mobile phone internal to the CD-2C, not the caller's location
